

Lancaster Agricultural Commission Meeting

Minutes November 7, 2022

Location: Lancaster Community Center

Attendees: Peter Jakubowicz
Eric Jakubowicz
Steve Mudgett
Maria Moreira

7:00 P.M. Minutes approved May 16, 2022

7:10-7:20 Bird Cannon- talked about the use of a bird cannon in fields off chase hill rd. There have been no more complaints about it and he uses it as needed to protect his corn crop as he has done for years. The use of this cannon during the day helps during the red wing black bird season.

7:20-7:40 Discussion on sludge in farm fields- Talked about the forever chemicals in the human waste sludge and how they are tested at the facilities for the ppm of these chemicals.

We talked about what we would say when asked questions about how safe it is.

At this point in time the state governs it as Safe. But should do your own research and check the source of the material that you are receiving.

7:40-8:00 Had a discussion on Gmo corn vs non Gmo and the difference between using Round Up or Atrazine to control weeds.

US, Germany, and Australia have not found a direct link to cancer from Round Up at this time.

8:00 P.M. Adjourned
