

# 2023 Sweeping List

*Here is the proposed sweeping list for the 2023 season. Sweeping usually begins late in March or early April. Because of the mild winter you may see the sweeper out sooner, cleaning up some of the heavy sand, trying to keep it out of our streams and waterways. We will start sweeping row 1 first and then once row 1 is complete move over to row 2 and so on. It generally takes 4 to 6 weeks to sweep the entire town depending on weather.*

*Residents that want to rake sand from their property edge are encouraged to do so. Please **DO NOT** place any Sticks, trash or rocks at the edge of road that could damage the sweeper. Sweeping the sand into a long line 6 to 8 inches from the edge will assist the operator in finding the edge.*
